

“DIY Interactive Kit” from Assistive Technology NZ Ltd (ATL)

Why mess around with expensive interactive whiteboards and get ripped off!

If you already have an interactive projector, you can, for as little as \$390, turn your plain board interactive, with a “DIY Interactive Kit” from ATL.

How can you do it?

It is really simple. Everything comes in a package: the hardware, the software, and an instructional DVD. And if you have any difficulty, just give us a call.

Can the system work on any plain board?

Yes, it can. You can even set the system up on your pelmet screen or even on your classroom wall!

Can I write on the board and save it on my computer?

Yes, you can. The package comes with 2 pens.

Do I have to pay for the software?

No, the package comes with the software; the package price includes the software.

What if I need personal help?

Ring or email us and we will walk you through the procedures. But if you need us to come on-site, we will, but there will be a small charge for the visit.

Will the package work on any projector?

Yes, so long it is interactive.

But I don't have a projector?

Well, we can get you to get one. Get I touch with us today.

What kind of computer must I have?

Any computer will do; the package is both Mac and PC compatible.

We have 3 classrooms that we would like to get interactive. How much will that cost?

For each additional package, you will get a further 5% discount. Each package will be licensed for warranty & support purposes.
